

High capacity symmetrical Internet service providing uncontended connectivity for basic and managed Internet access. This unmetered 'flat rate' offering is provided over our own Layer 2 network and multiple upstream providers for performance and availability. Managed service offering inclusive of content filtering and highly configurable network security.

NETCONNECT™

Our uncontended and unmetered symmetrical Internet service is never contended or 'throttled' and we provide strict SLAs for performance and availability. We also offer a range of security and threat management services for total peace of mind.

NETCONNECT INTERNET

Uncontended and unlimited Internet connectivity over fully managed access networks and diverse upstream providers. Netconnect offers enhanced options for protected access and 'burstable' capacity. Supports general Internet browsing, file transfer protocol (FTP), email (SMTP) and prioritised access to/carriage of any web application.

NETCONNECT PRIVATE

An enhanced Internet offering for organisations requiring a high level of security, threat management and application assurance. A fully managed and integrated next generation firewall for comprehensive content filtering, advanced intrusion prevention, unknown threat management, remote access, site-2-site VPNs and mobile security.

NETCONNECT ACCESS

Netconnect Access is standard and enhanced Internet services for channel partners and niche Service Providers. It's delivered over fully managed access networks and customisable to meet the specific customer requirement. Provided as basic IP Transit service or as enhanced offering for highly scalable and secure connectivity for demanding use cases.

SERVICE OVERVIEW

WHAT IT IS

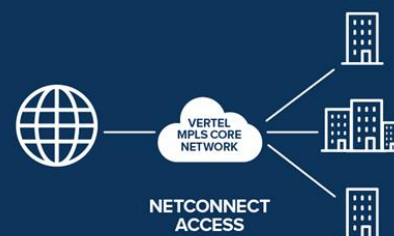

- Connectivity to redundant Tier 1 IP Transit providers.
- High capacity IP transit for basic and managed Internet access.
- Uncontended, unmetered high performance Internet service.
- Range of security and threat management services.

WHAT IT PROVIDES

- Domestic and international IP transit.
- Web browsing, FTP and web applications.
- High speed access to Cloud services.
- Facilitating e-commerce capabilities.
- Provisioning of VoIP and IP video services.

HOW ITS CONFIGURED

- Uncontended Layer 2 connectivity to IP transit point.
- Enterprise grade service with highly available carriage.
- Scalable bandwidths and service options available across Australia.
- Inbuilt redundancy and diversity with SLA and QoS performance guarantees.

FULLY MANAGED ACCESS

We control the connectivity between your sites and the Internet transit point. Access services are uncontended and symmetrical with QoS guarantees.

STRICT AVAILABILITY GUARANTEES

Diverse Tier 1 upstream Internet providers negate single points of failure. Standard (99.95%), protected (99.99%) and redundant (99.995%) access options for enhanced availability.

SYMMETRICAL INTERNET

Organisations with demanding Internet requirements need symmetrical 'up and down' capacity. That's exactly what you get with our Netconnect service.

UNCONTENDED AND UNMETERED

You get what you order. No service contention. No bandwidth throttling. No annoying 'excess data charges'. Just a quality Internet service.

NEXT GENERATION SECURITY

The more data you have running over the Internet the more at risk you are for security breaches. Go with our fully managed security offering for total peace of mind.

UNMATCHED SERVICE AND SUPPORT

Networks fail. Service issues arise. We pride ourselves on our support and maintenance capabilities to deal with planned and adhoc requirements.
